# 1. PRODUCT IDENTIFICATION

GREEN LEATHER GLAZE .It belongs to the leather effect glazes formulated without lead in its Description compositions. Compound of Frit CAS: 65997-18-4.

Application

They can be applied on white and also on red clay bodies, with better results achieved on the latter. They can be used for glazing in double-firing as well as also single-firing, with the addition of Monocol V. The recommended firing temperature is 980°C. (in a temperature range of 930° to 1020°C).
