1. PRODUCT IDENTIFICATION

Description Inorganic Pigment. Cassiterite Cr-Sn-Si. Maximun operating temperature 1200°C.

Application This series of pure pigments can be used both for coloring glazes, as for onglaze/underglaze decoration. In the first case, the intensity of the color will depend on the components of the glaze, as well as the cycle and the firing temperature. In the second case,the pigment should be mixed with a flux: lead flux Decor-flux-5 or Flux No. 50 and lead-free in composition flux: Flux 20 or Glaze F-15. The percentages of addition range 30-60%.
