

This is a new range of leather effect glazes formulated without lead in its composition. The range has 9 coloured leather effect glazes, all with a satin finish.

The glazes are suitable for use in the manufacture of culinary objects, to certify their food use, the final pieces must be submitted to lead migration test by an accredited laboratory. They can also be used for rustic-style ceramic tiles. They can be used for glazing in double-firing as well as also single-firing, with the addition of Monocol V.

The recommended firing temperature is **980°C**. (in a temperature range of 930° to 1020°C). They can be applied on white and also on red clay bodies, with better results achieved on the latter.

The leather effect series comprises the following products:

**5628** Leather.

**5628/NE** Dark Leather.

**5652** Clear.

**5656** Blue.

**5653** Green.

**5649** Blue.

**5654** Green.

**5655** Speckled Leather.

**5899** White.

*If needed, do not hesitate to contact our Technical Department for any queries or clarifications.*
